

Chameleon Network

The future of private transactions

chml.network

Executive Summary

Chameleon Network

Privacy-first blockchain
built for mass adoption

\$10.2M Raise

(100M Total Supply)

20M tokens pre-sale across 2 rounds starting at \$0.45 for round 1, and \$0.60 for round 2

3M+

Lines of Code

Over 50+ core dev contributors since 2018

\$45M

shielded (on old network)

BTC, ETH, USDT,
and 90+ other tokens

65%

Staking Rewards Pool

For validators/ liquidity providers over 20 years

3,500+

Previous Validators

Powering the previous network

Why now

The perfect time for privacy

US States charges ahead to adopt Bitcoin Reserve Legislation

Crypto Helps Propel ETF Industry to Record \$1 Trillion in 2024 Inflows

Crypto Today: Bitcoin price tops \$102K as Trump's firm acquires Ethereum and Chainlink

BlackRock's IBIT Hits \$50 Billion in Record Time as Bitcoin Surges Past \$100,000

The Privacy Gap: Crypto adoption is at an all-time high, but privacy features lag behind mainstream demand.

Increased Surveillance: Regulatory scrutiny & data breaches make privacy not just an option but a necessity.

Market Recovery Phase: Favorable global macro drivers combined with increased signs of privacy tech maturation.

Chameleon's Role: Positioned as the critical privacy layer for Web3, Chameleon ensures that individuals retain control over their financial sovereignty.

Problem

More adoption More surveillance

Public Transactions

Cryptocurrencies like Bitcoin and Ethereum expose transaction details on public ledgers, leaving users vulnerable to surveillance and tracking.

Chameleon Solution

Guided by the principle of "Privacy with Responsibility," Chameleon implements measures to prevent misuse by bad actors, ensuring the platform is not exploited for money laundering or illegal activities – while providing advanced privacy features to ensure confidentiality without compromising usability.

Australia Tightens Restrictions on Crypto ATMs, Bullish News for Monero and Lunex Network?

Lack of Privacy in Crypto Is Holding Back Institutional and Mainstream Adoption

Monero Hits Two-Year High of \$211 as Privacy Coin Market Sees Surge Following Tornado Cash Court Ruling

Solution

Chameleon Network Privacy mode for crypto

Public Bitcoin
transaction

Alice sends 0.1
BTC to Bob

Chameleon
Bitcoin
transaction

Privacy first architecture &
cross-chain compatibility

Regulatory compliance
focus without
compromising privacy

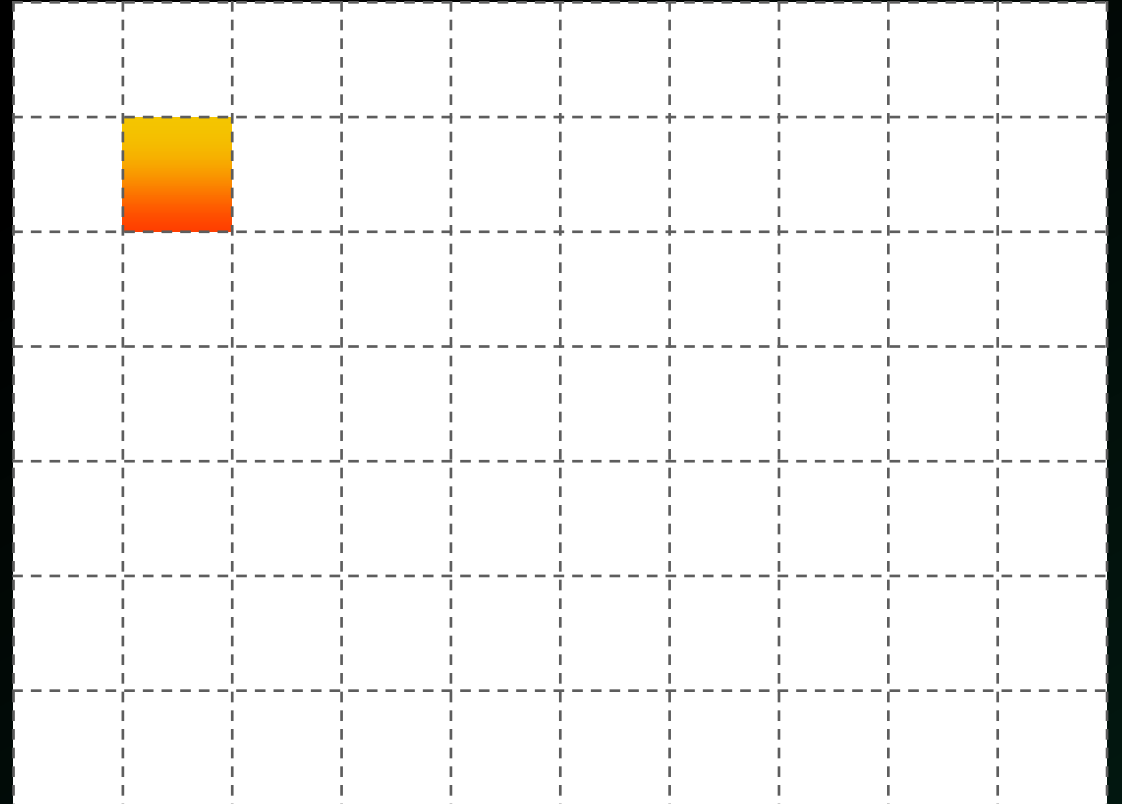

Ring signatures,
stealth addresses &
zero-knowledge proofs

Market Validation

Privacy coins are gaining traction

But they're still a drop in the ocean

 **\$15B+**
Market cap of privacy coins (XMR, ZEC, etc.)

 **\$3.5T+**
Market cap of public coins

Because people don't want to sell their holdings for privacy coins. They don't want to sacrifice flexibility or utility.

What they really want is privacy for every coin they hold, and for everything they do.

Market Size

Chameleon turns any coin into a privacy coin

DeFi TVL: \$100B+

 **\$15B+**
Market cap of privacy coins (XMR, ZEC, etc.)

 **\$3.5T+**
Total Addressable Market

Positioning

Privacy for every coin

Network

First-mover competitive advantages

1st

Privacy platform

Chameleon builds on proven technology, offering private transactions for BTC, ETH, and other major assets from day 1.

1st

Privacy proof-of-stake

More efficient than PoW privacy blockchains.

1st

Privacy sharding

10x TPS of other privacy blockchains.

1st

Privacy for De-Fi

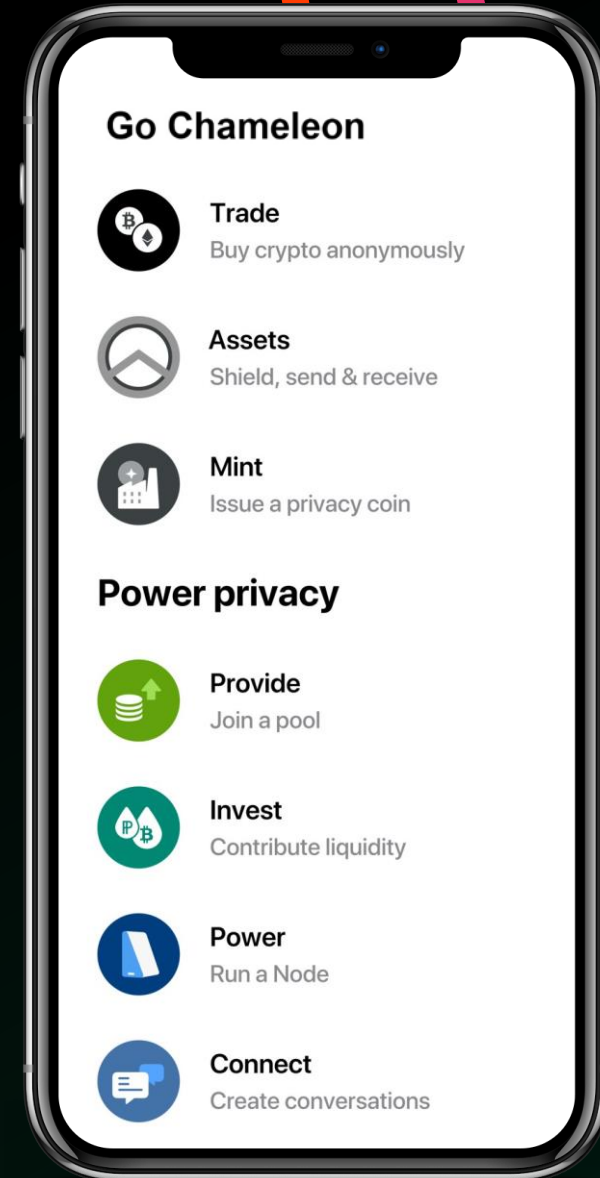

Privacy mode for smart contracts.

Utility

Privacy for any crypto activity Invest. Trade. Mine. Hold. Build

Anonymous, permissionless,
decentralized cross-chain swaps

Utility

Power privacy to earn rewards

Just plug & play to mine CHML

Utility

Privacy mode for any blockchain

Utility

Expanding the privacy layer for the internet of value

Privacy for smart contracts

Uniswap and Kyber were the first DeFi applications to explore privacy.

Buy privacy coins privately

Chameleon pDEX would be the official privacy DEX for Monero.

Trustless connections

Trustless bridges to networks with and without smart contract languages.

CHML is the fuel for Chameleon

Powers the network

Users stake CHML to become validators and power the network.

Provides anonymous liquidity

Providers contribute CHML to power cross-pair anonymous trading of hundreds of cryptocurrencies.

Enables cross-chain value transfer

Lock CHML to join a network of distributed custodians that enable cross-chain transactions.

CHML is a truly useful cryptocurrency

Shield any coin

BTC, ETH, DAI, USDT and hundreds of other crypto.

Buy & sell crypto

Without a trace.

Use any dApp

Anonymously, cross-chain.

Hold & transfer crypto

Obscured from public ledgers.

Tokenize assets

As native privacy coins.

Invest crypto

Anonymize your balance sheet.

If privacy wins, Chameleon wins

Ways to acquire CHML tokens, after pre-sale

Buy / Trade

Buy or Trade CHML post pre-sale rounds on Uniswap after TGE, and in the Chameleon Wallet using our pDEX after Mainnet launch.

Mine

Host a Node (Vnode or Pnode) and mine CHML after Mainnet launch. Pnode owners just need to connect the device to their internet using our app and you're mining.

Earn

Earn CHML by participating in community development initiatives/activities, or by providing liquidity for a growing range of tokens/pairs on pDEX.

Breakdown of use of Funds

2025

A diverse founding core team

10+

10+ team of Blockchain Developers, cryptographers, programmers, entrepreneurs, creatives, and operators – all with over 20+ years of development and industry experience.

Post-fundraising, Chameleon will strategically grow its team to accelerate development, enhance user experience, strengthen security, and drive mass-adoption at scale.

We also have access to a strong team of technical advisors, strategic partners and industry support.

2025

Thriving Community of Builders

Chameleon inherits a robust and engaged community from its predecessor project, which boasted:

20+

core developers
actively
contributing
to innovation

1,000+

network
contributors
supporting
the ecosystem

3,600+

validators
powering
decentralization
at its peak

10,000+

users actively
utilizing
privacy-focused
solutions

Today, a sizable portion of this community remains actively engaged in Chameleon's ecosystem, ready to drive its success!

Token Economics & Vesting Schedule

CML Tokenomics (Total Allocation 100M)

Total Supply:
100,000,000 CHML

Reward Pool: 65%
(65,000,000 CHML)

***Presale:** 20%
(20,000,000 CHML)

***Community Airdrop:** 5%
(5,000,000 CHML)

Staking Infrastructure: 5%
(5,000,000 CHML)

Ecosystem Development: 3%
(3,000,000 CHML)

Initial Liquidity Pool: 2%
(2,000,000 CHML)

* Community Airdrop and Presale Tokens come with a vesting schedule at TGE, testnet launch and mainnet launch. Please check out our whitepaper or detailed tokenomics for the full vesting schedule.

Reward Emission Rate

Reward Pool (65M CHML Allocation)

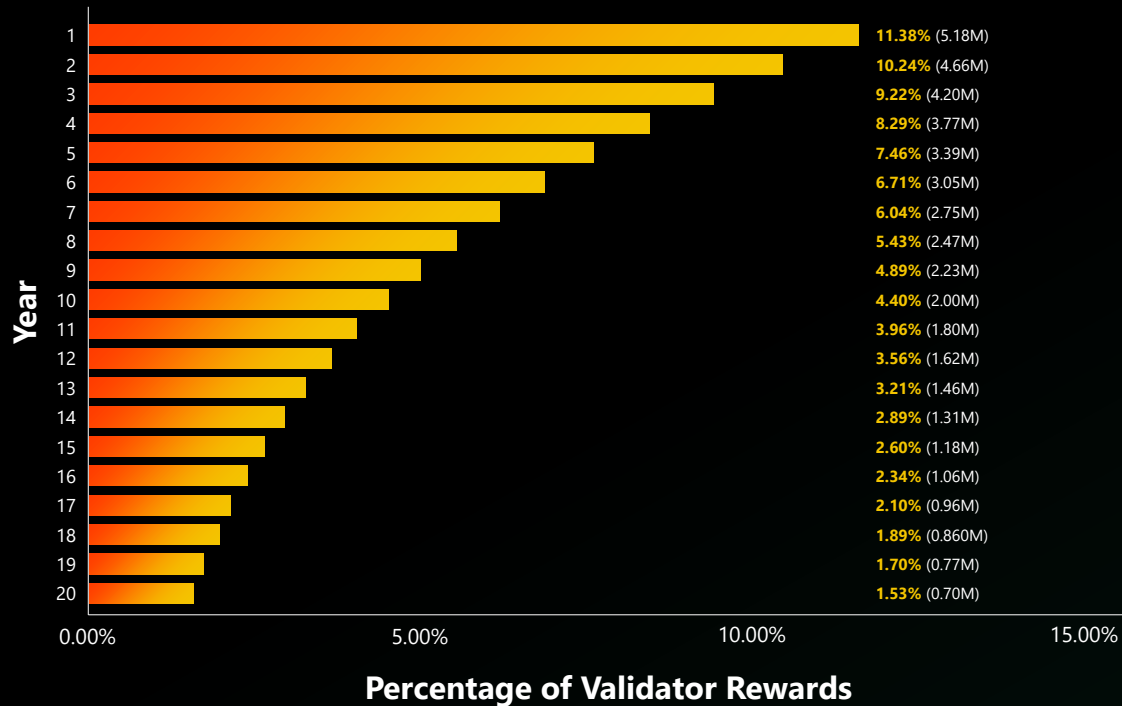

Total Rewards Pool: 65 million CHML tokens

The total reward pool of 65M tokens will be distributed over a span of 20 years. This emission schedule aims to incentivize early participation while ensuring long-term sustainability and gradual token release. The rewards will follow a declining pattern over the years (10% block rewards reduction YoY from genesis block), with a higher percentage of rewards distributed in the initial years, gradually decreasing as the years progress.

Rewards Breakdown – Validators & Liquidity Providers

Validator rewards (45.5M CHML Allocation)

Liquidity provider rewards (19.5M CHML Allocation)

Total Rewards Pool: 65M CHML tokens

Rewards will be distributed among two key categories: Validator Node operators and Liquidity Providers.

Validator Rewards: 45.5M CHML tokens (70% of the rewards pool)

Validator rewards will follow a gradually decreasing emission schedule over a period of 20 years.

Liquidity Provider Rewards: 19.5M CHML tokens (30% of the rewards pool)

Liquidity Provider rewards will also adhere to a declining emission schedule over 20 years, similar to the approach taken for Validator Rewards.

Dynamic Yield Optimization for LP:

Liquidity Provider rewards will use a dynamic yield optimization algorithm to balance the required depth and liquidity amounts across various pools on pDEX.

Roadmap & Vesting Schedule

Testnet & App Launch

- Token presale, fundraising & Airdrop
- DAO creation & Uniswap listing
- Launch Testnet & Chameleon app

Q1
2025

Ecosystem Expansion

- Enhance & Deliver Key Security Modules
- Cross-Chain Interoperability / Scaling
- Marketing & Strategic Partnerships

Q3
2025

Q2
2025

Mainnet Launch

- Code refactoring & security audits
- Ramp up staking infrastructure (nodes)
- Launch Mainnet & Updated app

Governance & Community

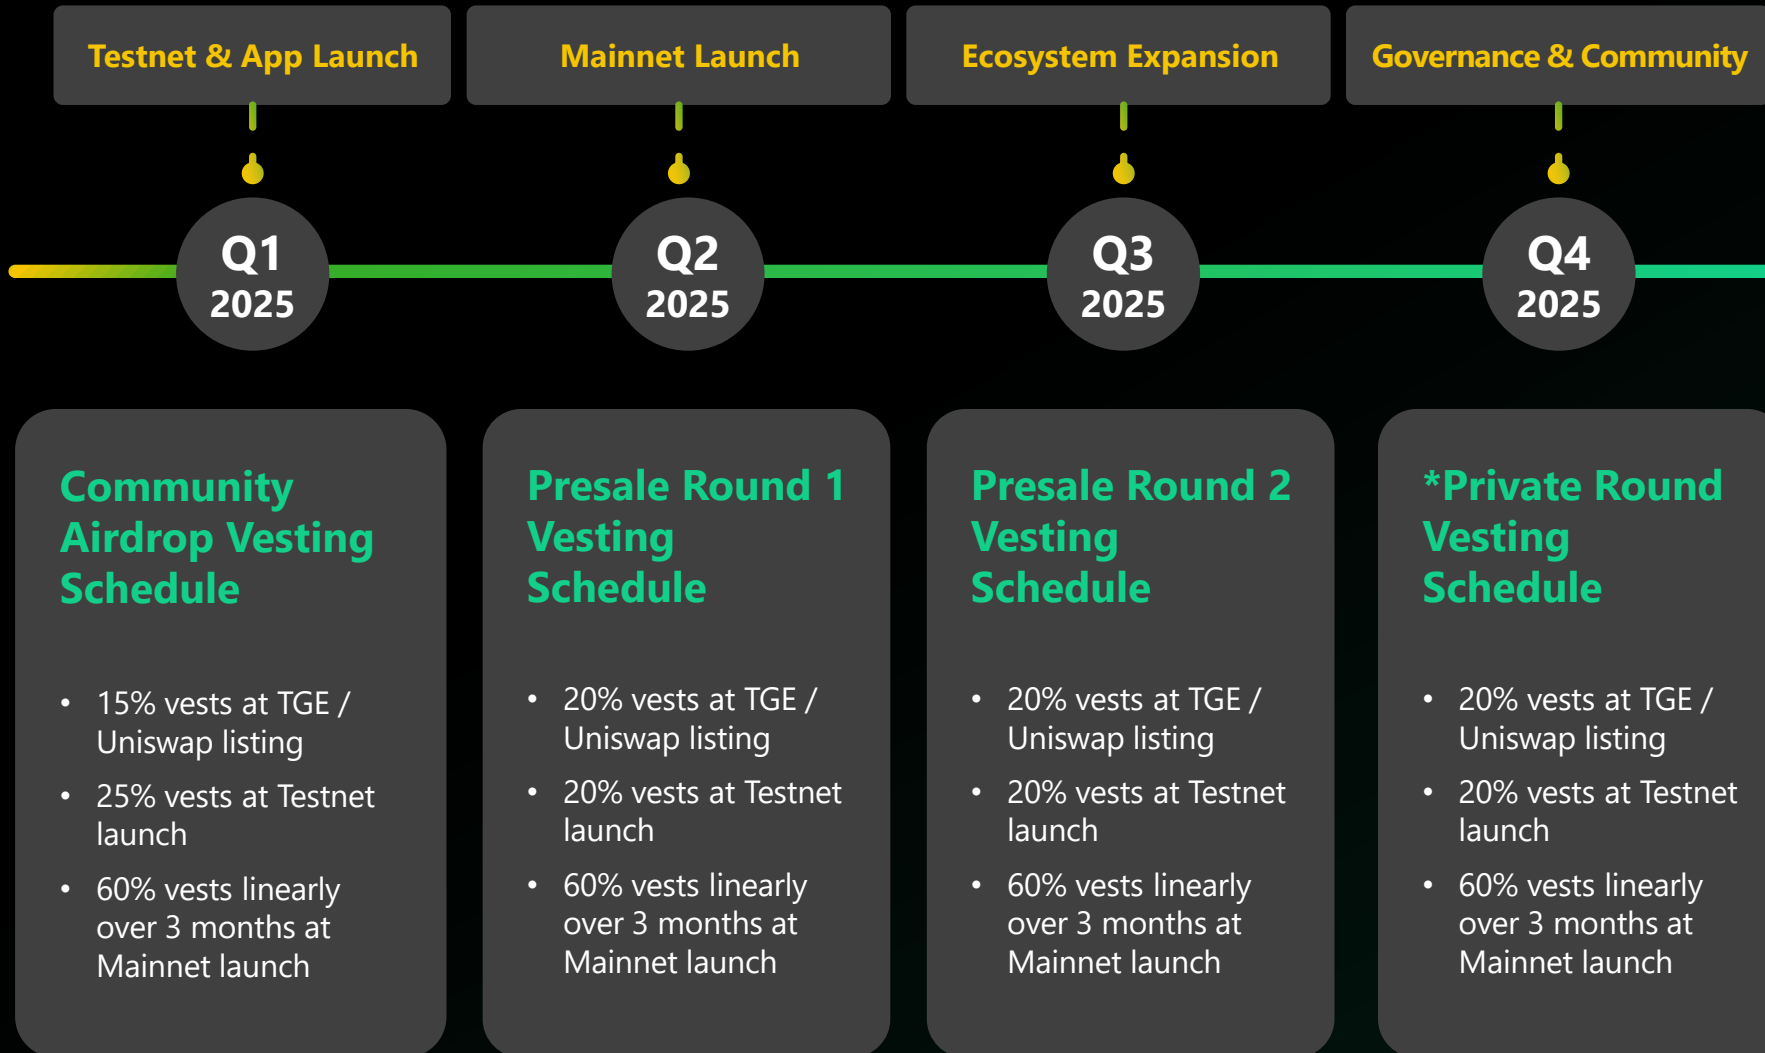

- Governance Proposals for Voting
- Community and Developer Growth
- Hardware Manufacturing Partnerships

Q4
2025

2026 Strategic Objectives:

- Advanced privacy features
- Decentralization & reducing fixed nodes
- Partnerships & scaling solutions

Roadmap & Vesting Schedule

2026 Strategic Objectives:

- Advanced privacy features
- Decentralization & reducing fixed nodes
- Partnerships & scaling solutions

* Private round(s) only occur in the event of unsold tokens during public presale rounds 1 and 2.

Chameleon Network

Privacy Stack

Now we can send, receive, buy, sell, invest and borrow cryptocurrencies confidentially

Ring Signatures

Shielding sending addresses

Stealth Addresses

Shielding receiving addresses

Confidential Transactions

Shielding transacted amounts

Homomorphic
Commitment

Zero-Knowledge
Range Proofs

Chameleon Network

Scalability Stack

Chameleon will be the first network that delivers privacy at scale by implementing proof-of-stake and sharding

Proof of Stake

Sharding

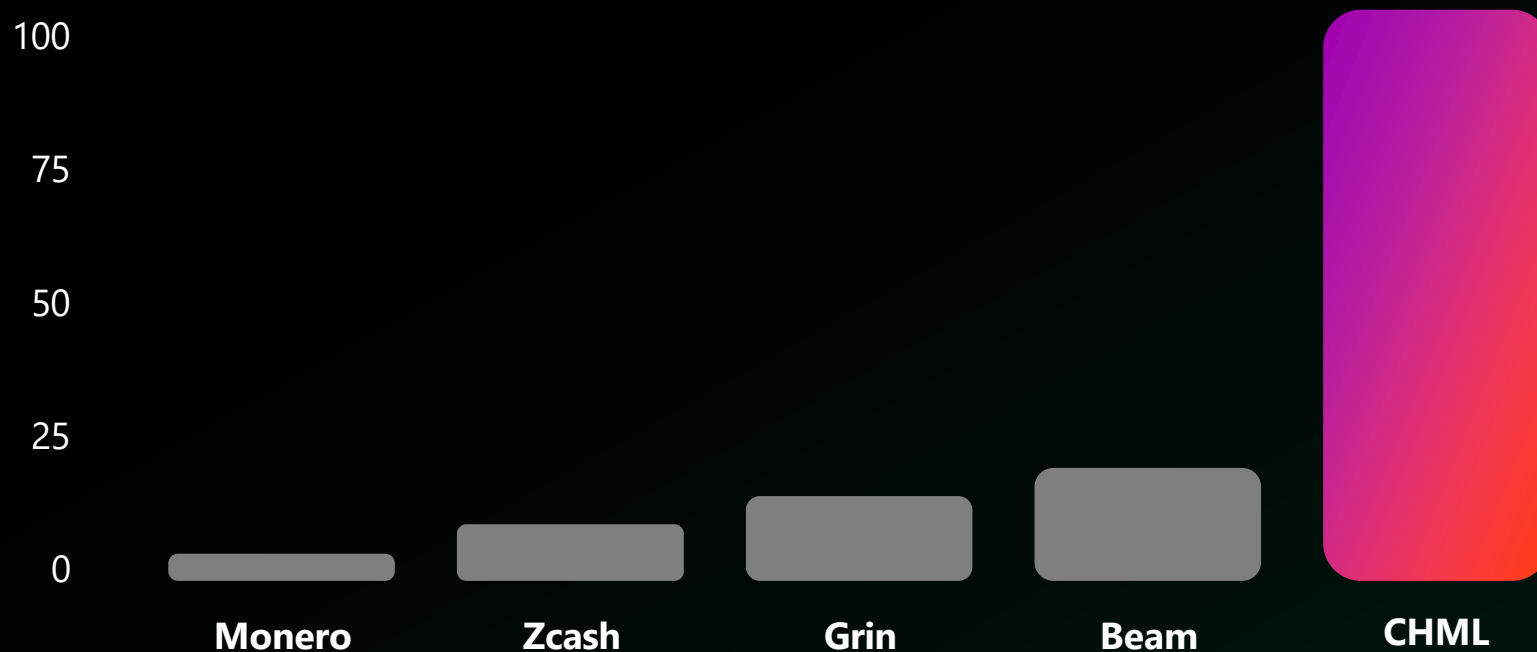

pBFT

BLS Signatures

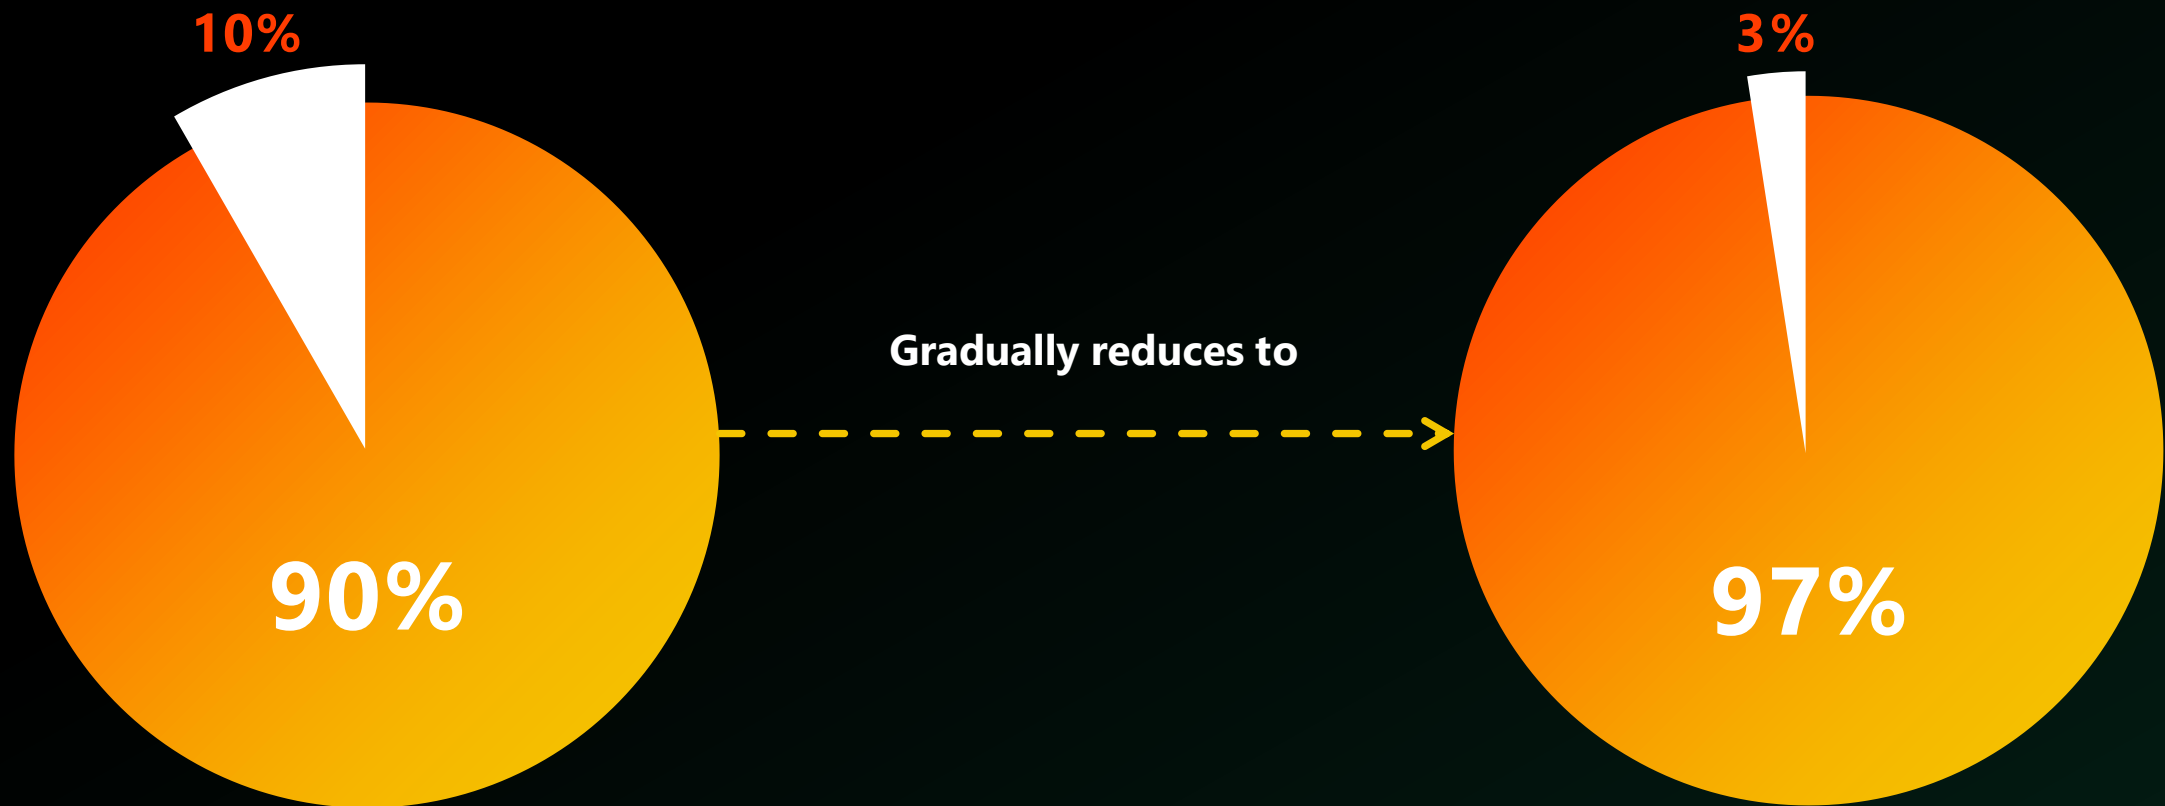

Performance

Chameleon will deliver privacy at scale with 100 TPS — a significantly higher number than that of other privacy blockchains

Chameleon DAO

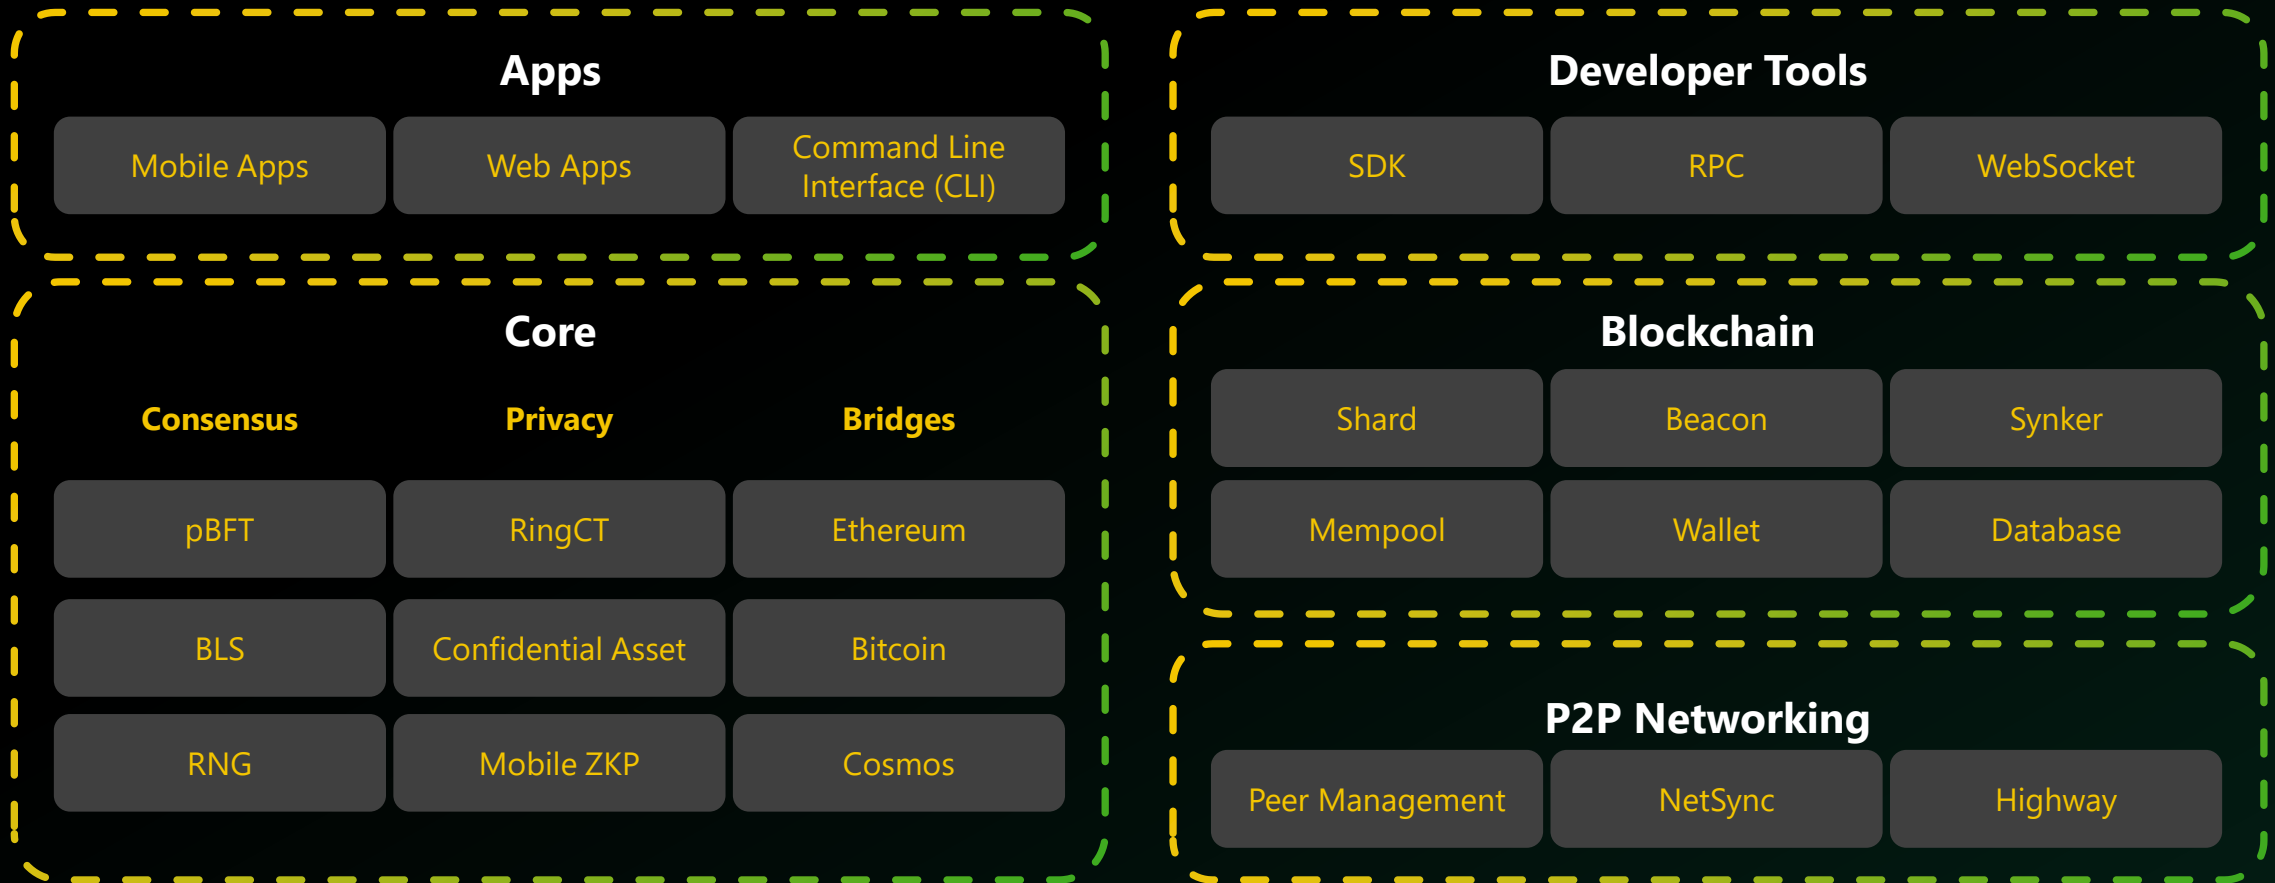

Designed to fund protocol development and network growth, Chameleon DAO collects a gradually reducing percentage of block rewards

Code Structure

Chameleon builds on the solid codebase of its predecessor project, which had 33 public GitHub repositories and over 3 million lines of code since May 2018. It enhances this foundation to provide advanced privacy features and better scalability. Chameleon remains open source, promoting transparency and encouraging community contributions.

Thank you
